● PROJECTS

Hotel Management System

A Hotel Management System built with Django and Python, utilizing Django REST Framework for seamless API integration. This system offers efficient room booking, guest management, and service tracking, providing a robust backend for smooth hotel operations. Ideal for businesses looking to streamline their workflow and enhance the guest experience.

HRM Suite

HRM Suite is a comprehensive Human Resource Management system built with Django and Python, featuring Django REST Framework for API development. It provides tools for employee management, payroll, and performance tracking, all integrated with version control for seamless collaboration and updates. Designed to simplify HR processes and improve organizational efficiency.
